

NADCAP

NADCAP & Customer Expectations

Certification to AS 9100 and NADCAP is increasingly becoming an international customer contractual requirement and is often used as a discriminator during supplier selection.

Whilst Glenair is accredited to AS9100, we have no immediate business needs to undertake a NADCAP assessment.

NADCAP accreditation is primarily based on:

SPECIAL PROCESSES

- Non-destructive Testing (NDT)
- Materials Testing (MTL)
- Heat Treating (HT)
- Coatings (CT)
- Chemical Processing (CP)
- Welding (WLD)
- Nonconventional Machining & Surface Enhancement (NMSE)

Glenair's product portfolio does include some of the above special processes, but these are outsourced to NADCAP suppliers where it is appropriate.

Primarily, this involves surface treatments.

We will continue to monitor the needs and expectations of our customers and, should there be a business need to seek NADCAP approval, it will be considered.
