

**Compliance statement: 007revB**

## **ITAR- International Traffic in Arms Regulations EAR - Export Administration Regulations**

Glenair UK Limited manufactures Connectors for the Aerospace, Military and Industrial markets.

Our product range in the UK: -

The design and manufacture of cable fitting accessories for circular electrical connectors.

The design and manufacture of micro connectors, cable harnessing and general electronic assembly.

The assembly, service and repair of crimp tooling and accessories.

### ***Our European Sales Offices:***

Provide Technical Support and supply of: -

- Micro & Nano miniature connectors
- Circular & Rectangular connectors, backshells & accessories
- Composite boxes & accessories
- Special connectors
- Custom cable harness solutions
- Fibre optic harness systems
- Connector tooling

The items we market and manufacture are either produced here in the UK or in Italy with the majority of our accessory components (backshells) being produced by our parent company in the USA.

Backshells & connector tooling is not relevant under ITAR restrictions.

The majority of our products can be used in different environments and as such some of them may be used in weapons equipment, however Glenair as a component manufacturer, cannot control their end use or purpose.

In our considered opinion, our product range does not need to be licensed under ITAR. However we do produce (US) a small range of specialist hermetic and filtered sealed connectors for the European market which are subject to ITAR and our Sales Department will be able to assist with these products.

As for Connector accessories, these are Mil 38999 parts and as such are in the public domain and are not regarded as an issue under ITAR.

This statement is periodically reviewed to ensure that it remains as accurate as it can be.
