Mitsubishi Quality Product Alert - O rings and seals

Request for Information – Mitsubishi Materials Corporation (MMC) Subsidiaries

Having received your request for a response to the above subject, recent media coverage regarding non-conformance issues with certain products manufactured and supplied by Mitsubishi Materials Corporation (MMC) subsidiaries Mitsubishi Cable Industries Ltd and Mitsubishi Shindoh Co Ltd.

Namely: O rings and seals

Information is available in the public domain following the public announcement by MMC and it is noted they are working with their affected customers to address the issue; please refer to attachments for more details.

Mitsubishi Cable have stated that measurement data at its Wakayama Prefecture plant for O-rings, a rubber material used as a seal to keep out oil, water and other liquids was not correct.

The reported and alleged data fabrication at Mitsubishi Cable took place for two and half years with products potentially sent to hundreds of customers at home and abroad.

Mitsubishi Materials has said that it has not found any safety or legal problems relating to the data falsification.

Glenair is constantly being asked to investigate and provide records of any of these products that may have found their way into our products.

Glenair does not procure or use O rings or gaskets manufactured by Mitsubishi.
